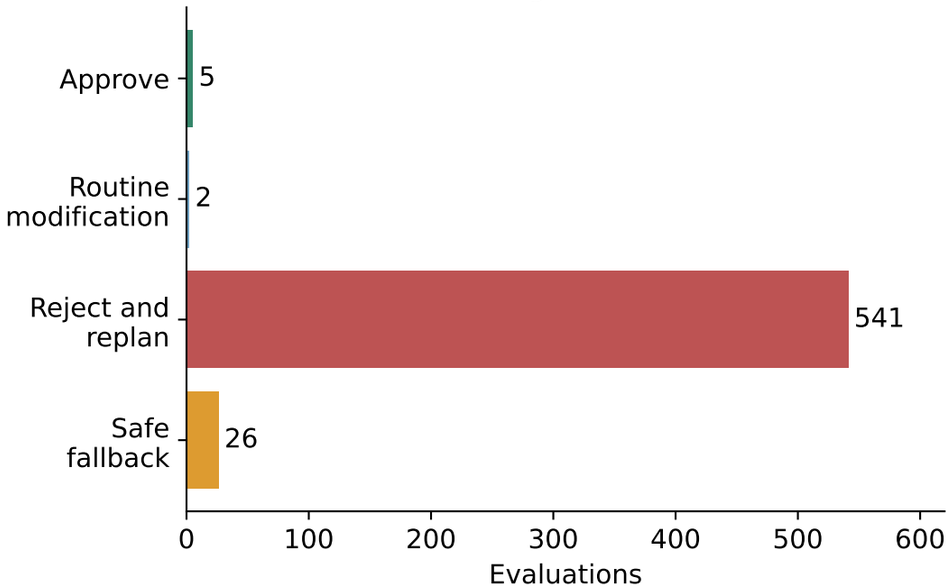
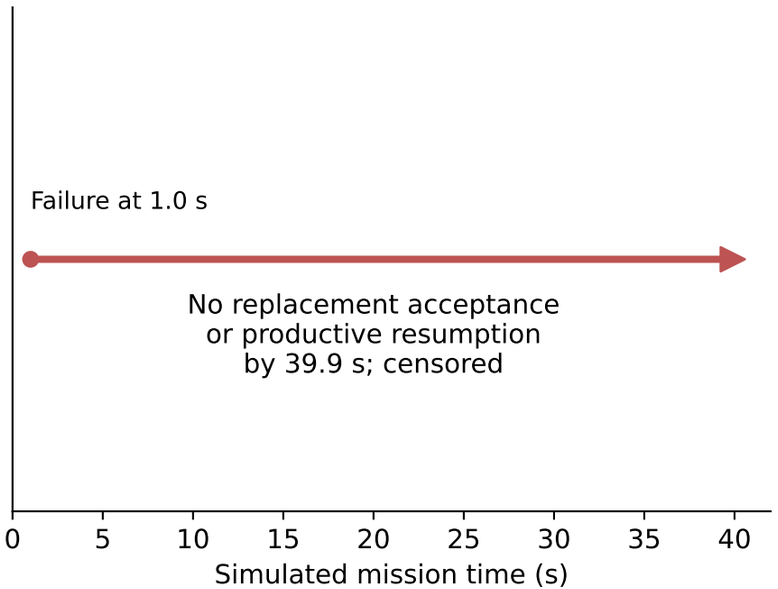
Phase 15: an unsuccessful recovery is retained; real LLM evidence is reported separately





Separate real pinned-model test

Nominal D, mock flight, wall clock

4/4 tasks; completion: 173.6 s
5 LLM calls; 0 response errors
Mean response latency: 14.16 s
15,218 input + 360 output tokens
24 routine modifications
0 corrective interventions

No degraded pinned comparison yet

Failed-worker mission: 0/4 tasks, 516 unverifiable-state rejections. No collision sensor: collisions are unknown, not zero.
